Figure 1

“…The approach at the community level has stalled.”
(Pianka, 1992)

- Assembly Rules (Diamond 1975)
- Limiting similarity (MacArthur & Levins 1967)
- Island biogeography (MacArthur & Wilson 1967)
- Competition vs Predation (Hairston, Smith & Slobodkin 1960)
- Local vs Regional effects (Ricklefs 1987)
- Experimental community ecology (Brown & Munger 1985)
- Functional traits (McGill et al. 2006)
- Community Phylogenetics (Webb et al. 2002)
- Neutral Theory (Hubbell 2001)
- Stabilising-Equalising Framework (Chesson 2000)

“Island biogeography and competition vs predation are the oldest theories in the list.”

“…”The approach at the community level has stalled.”
(Pianka, 1992)
